Public Statement of Fosun International Limited

Fosun International Limited ("Fosun") values and respects internationally recognized human rights and is committed to conducting business in full compliance with applicable laws, regulations, and the United Nations Guiding Principles. In relation to the Office of the United Nations High Commissioner for Human Rights ("OHCHR") database of business enterprises alleging our involvement in certain activities in the Occupied Palestinian Territory, Fosun wishes to provide the following information and perspective.

While Fosun values constructive dialogue, it regrets that the clarifications and supporting documentation submitted to the OHCHR during the review process do not appear to have been fully reflected in the assessment's outcome, which resulted in the company's inclusion in the updated OHCHR database. Fosun notes that this inclusion in the database is based solely on the historical activities of its subsidiary, AHAVA Dead Sea Laboratories Ltd. ("AHAVA"), which is alleged to have operated premises in Mitzpe Shalem in the Occupied Palestinian Territory, and does not pertain to Fosun's own operations. The company considers attributing such involvement to the parent entity as not reflective of its actual conduct and as not accurately representing its long-standing commitment to lawful operations and the protection of human rights. Accordingly, Fosun respectfully maintains a different view of the conclusions reached.

With respect to the alleged activities of AHAVA referenced in the database, a comprehensive internal review and confirmation by senior management indicate that AHAVA has decided to cease operations in the Mitzpe Shalem area in 2020. All business activities have been fully relocated to Ein Gedi, a location situated within the internationally recognized borders of Israel. This change in operational status has been independently verified. In particular, the NGO "Who Profits," which had previously listed AHAVA in its public database of companies operating in the West Bank, officially removed the company in 2024 after reviewing supporting evidence and provided formal written confirmation. Fosun respectfully requests that OHCHR take these facts into full consideration and recognize that the company is no longer engaged in any activities falling within the scope of the referenced report.

Fosun maintains robust internal procedures to ensure compliance with international human-rights standards and continually reviews its business operations. We engage constructively with stakeholders, including United Nations institutions, civil society, and investors, and welcome dialogue grounded in facts and mutual respect. Fosun remains committed to transparent engagement with the OHCHR and all interested stakeholders and trusts that this statement clarifies that neither Fosun nor AHAVA is involved in any activity falling within paragraph 96 of report A/HRC/22/63 and that Fosun operates in alignment with international norms and best practices.
