United Nations publication, issued by the Office of the United Nations High Commissioner for Human Rights (OHCHR).

This data sources guidance is a component of *Promoting the Rights of Persons with Disabilities through the Sustainable Development Goals: a Resource Package*.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Symbols of United Nations documents are composed of capital letters combined with figures.

Mention of such a figure indicates a reference to a United Nations document.

All components of the Resource Package have been produced with the financial support of the European Union. Their contents are the sole responsibility of OHCHR and do not necessarily reflect the views of the European Union.

31.20: Level of satisfaction with the national statistical system in terms of type of data collected and disability disaggregation by users with disabilities, disaggregated by sex, age and disability

Level 2: Indicator can be produced with straightforward additions or modifications to existing data collection efforts

This information can be obtained through a user satisfaction survey, such as the one undertaken yearly by Eurostat (see, for example, the report on the Eurostat 2017 User Satisfaction Survey). Currently, the survey does not ask respondents about their satisfaction with disability data or about their disability status, but such questions could be added.

31.21: Number of reports intended for the general public produced by the State in accessible formats, disaggregated by type of format and their proportion out of the total number of reports published by the State

Level 2: Indicator can be produced with existing data but has not been reported on

Currently, national statistical offices list all the reports they produce. An indicator listing the accessible formats in which the reports are available (e.g. audio, Braille, large print and easy-to-read summaries) could be added to the listing of these reports. Producing such an indicator would be straightforward.

For example, the Uganda Bureau of Statistics lists all of its reports by theme, title, size, and dates of publication and of uploading, a sample of which is presented in the table below. An additional column could be added to list the formats in which each publication is available.

Extract of the list of publications of the Uganda Bureau of Statistics

Theme	Publication title	Date of publication	Size of document	Date of upload
National accounts: environmental accounting	*Uganda Wood Asset and Forest Accounts Report 2020*	3 March 2020	9.14 MB	3 September 2020
Prices: consumer price indices	*Consumer Price Index: August 2020*	28 August 2020	1.19 MB	28 August 2020
Business and industry: consumer price indices	*COVID-19 Business Survey March to April 2020*	19 August 2020	7.12 MB	19 August 2020
Agriculture: consumer price indices	*Annual Agricultural Survey Calendar Statistical*	17 August 2020	225.68 KB	17 July 2020
Public health: consumer price indices	*UBOS COVID-19 Information Series No. 31*	13 July 2020	8.38 MB	13 July 2020
